CPU Tech and EADS North America Defense Test & Services to Demonstrate System Modernization at 2007 AUSA

PLEASANTON, Calif. – October 1, 2007 – CPU Technology, Inc.® (www.cputech.com) today announced plans to demonstrate its unique electronic system modernization capabilities and process at the 2007 AUSA Exposition, October 8-10, 2007, at the Washington Convention Center, Washington, D.C. CPU Tech will join EADS North America Defense Test and Services, Inc. (EADS) to give demos in booth number 2149.

CPU Tech will demonstrate advanced System-on-a-Chip (SoC) technology and discuss its development process for solving obsolescence in large scale systems while enhancing performance and functionality and maintaining 100% software compatibility. Part of CPU Tech's modernization technology includes the new SystemLab PS™ Platform Simulator, which, running large scale virtual system models at real time speeds, provides complete visualization and control of an entire platform.

"The presentation of CPU Tech's industry-leading modernization process, which includes real time virtual modeling capabilities, further illustrates our commitment to dramatically improve systems, while directly addressing the technological challenges of our Army Aviation and Army Missile Command customers," said Jim Mulato, Executive VP, EADS North America Defense Test and Services.

"Exhibiting with EADS provides a great opportunity for CPU Tech to demonstrate the powerful impact our unique modernization technology offers when combined with the service and support of a world class, globally reaching organization with large scale system process experience," added Robert Beanland, CPU Tech VP of Marketing.

About CPU Technology, Inc.

CPU Technology, Inc. (CPU Tech) develops and supplies Compatible SoC solutions for the high-end computing market. The company's products and services directly address the challenges associated with the transformation of microprocessor-based electronic systems to the SoC / MultiCore era. CPU Tech is a privately held company founded in 1989 with headquarters in Pleasanton, CA, and business development offices in Reston, VA. Visit www.cputech.com for additional information.

About EADS North America Defense Test and Services

EADS North America Defense Test & Services, a subsidiary of EADS North America Defense Company, designs, manufactures, sells, and services electronic test and measurement equipment, systems, and software to leading high-technology customers throughout the world. The company works with core customers to define test requirements and deliver support solutions by providing general purpose ATE products, designing and building unique ATE, enhancing and integrating software offerings, and establishing nationwide OEM and military test engineering services. Among the key market sectors the company serves are Military, Aerospace, Marine, Medical, Telecommunications, Semiconductor, and Commercial Manufacturing.
